FERTILUQ S 20-20-20

COMPOSITION

20% total nitrogen (N) by weight. 5.7% nitric nitrogen (N) by weight. 3.9% ammoniacal nitrogen (N) by weight. 10.4% ureic nitrogen (N) by weight.

20% water-soluble and neutral ammonium citrate-soluble phosphorus pentoxide (P₂O₂) by weight.

20% water-soluble potassium oxide (K₂O) by weight.

Microelements

0.025% water-soluble boron (B) by weight in mineral form. 0.01% water-soluble copper (Cu) by weight, chelated by EDTA. 0.04% water-soluble iron (Fe) by weight, chelated by EDTA. 0.003% water-soluble manganese (Mn) by weight, chelated by EDTA. 0.003% water-soluble molybdenum (Mo) by weight in mineral form. 0.015% water-soluble zinc (Zn) by weight, chelated by EDTA.

USES

In its composition, FERTILUQ S 20-20-20 provides a high and balanced nitrogen, phosphorus and potassium content (1:1:1) as well as chelated microelements, forming a complete highly soluble fertilizer totally assimilable by the plants so it can be applied at all vegetative stages of all types of crop.

DOSES AND HOW TO USE

Apply in normal foliar spray at doses comprised between 150-300 g/hl of water depending on the stage of development of the crop and the required nutritional needs.

USAGE PRECAUTIONS

Avoid treatment at times of most sunlight.

It can be used in conjunction with most plant protection products.

Do not mix with oils or with strongly alkaline products or products that contain calcium.

For more information, please consult our Agronomy Technical Department.
