

FERTIAZUL COBRE

Suitable for organic production

1 kg
5 kg

COMPOSITION

50% w/w total water-soluble Copper (Cu).

USES

A treatment for copper deficiency in all types of crops; particularly suitable for olive, almond, citrus, vine, stone and pome fruit trees as well as vegetables.

DOSAGE AND METHOD OF USE

Leaf application: Apply as a foliar spray at the standard rate of 150–250 g per hectolitre of water. Depending on the crop's stage of development and the severity of the deficiency, 2 to 4 spray applications per growing season are recommended.

PRECAUTIONS FOR USE

Avoid carrying out the treatment during the hottest part of the day.

For citrus trees, apply at the start of the growing season and before summer shoots appear. Take precautions due to the phytotoxicity associated with copper, particularly in humid areas and with certain varieties of fruit trees and other crops. For further information, please contact our Agricultural Technical Department.

HAZARD CLASSIFICATION

Fertiliser authorised for use in organic production in accordance with Regulation (EU) 2018/848. Complies with the UNE 142500 standard.
